

Which LSP is Best for...

WorkFlows

- Fully functioning library software containing patron and item information
- Locally installed, client-based software used to complete daily tasks such as circulation, cataloging, reporting, and includes an offline mode
- Available for PC and Mac
- Manage your collections efficiently whether a small or large library

BLUEcloud

- Modern, web-based interface compatible with PCs, Macs, and Chromebooks
- Seamlessly integrates with WorkFlows
- Includes time-saving circulation and cataloging features
- Includes BLUEcloud Course Lists, which lets librarians and teachers collaborate on curated resource lists for students

MobileStaff

- Mobile-based circulation app that works directly with WorkFlows
- Available for web, Android, iOS, and Chromebooks
- Circulate materials, inventory, weed, manage holds, and offer more services by taking the library to the classroom
- Self-service kiosk mode keeps the library running efficiently

SymphonyWeb

- Web-based interface for WorkFlows
- Complete daily tasks such as circulation, cataloging, and reports from a web browser
- No client installs required
- Works on PCs, Macs, Chromebooks, and with Google Docs and Google Sheets
- Available from your ITC for a small additional fee
